

**BEOBAL Project conference**

***“Global Changes, Environment,  
Sustainable Development of the Society  
and High Mountain Observatories Network”***

**21 -25 March 2007**

**Gyulechiza, Rila Mountain, BULGARIA**

The conference will be structured into 3 sections:

- **Global change investigations and observing. Environmental consequences and future threats of global changes**
- **Global changes and sustainable development – problems, adaptation and preparedness towards the knowledge based**
- **Society and Economy**
- **High Mountain Observatories Network – their changing role, responsibilities and prospects. Technical infrastructure, reliability, safety, management and globalization aspects**

A special attention will be paid on integration and cooperation processes in ERA and worldwide.

The special attention will be paid on the new key role of HMO - ground based or extraterrestrial objects they are?.

BEOBAL project first results and problems will be also considered.

Problems of funding and national and international management will be considered – ideas and propositions for future joint proposals will be welcome.

Science communication and rising of public awareness in HMO activities will be one of key points of discussion.

Best practice in all these fields will be presented and exchanged.

The participants:

HMO with some of their partners' institutions representatives

Leading scientists and experts of European, international and intergovernmental institutions and organizations

Bulgarian authorities and academia representatives

The contributions will be published in the vol. 10 of OM2 series.

**Confirmation of participation (registration): 14 Mar 2007**
